

Your Title

Author One* and Author Two[†]

A University, Exemptown, The Netherlands, 4321 AB

(Your abstract)

I. Introduction

THIS is how you work with the file. Add lettrines to beginnings of sections. Units work like this 13.3 km, unit-less numbers like this 12 991.912 41 or this $1.098\,118 \cdot 10^{-8}$, and angles like this 1.781° . Put citations only after dots or commas, like this.¹

II. Conclusions and Future Work

This should get you started. When using in-line citations use Ref. 1. Note that the tilde \sim is used as protected space.

Acknowledgments

Ingo Gerth would like extend his gratitude to the easter bunny for all the strong support on creating this wonderful template. Thanks so much.
